Identification of peer effects through social networks Bramoullé et al. May 1, 2009

Chapter 54 - Interactions-Based Models Brock and Durl... January 1, 2001

Identification of Endogenous Social Effects: The Reflect... Manski July 1, 1993

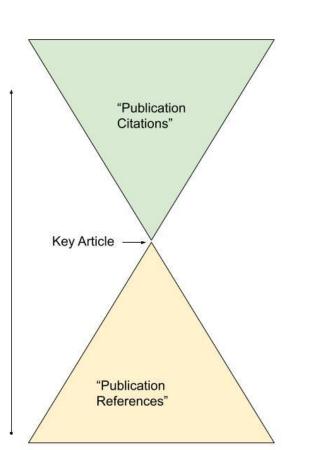

I want more like it"

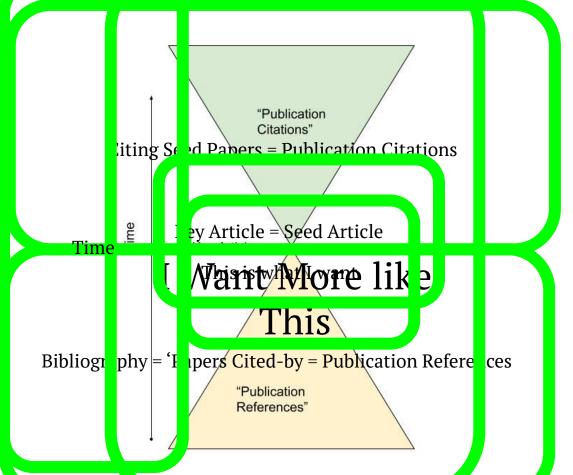

"This is what I want.

Finding, not math.

- 3D Citation Mining
- One additional tool, not a replacement for the search
- Requires a mental model of research process
- Maps are a visualization of what you've already found and their interconnections, not a keyword search
- Zotero is the base.

Color Code

Citation Gecko

VosViewer & Dimensions

Three Key Articles

An economist PhD candidate defined the key articles in the field

Manski, C. F. (1993). Identification of Endogenous Social Effects: The Reflection Problem. *The Review of Economic Studies*, 60(3),

531. https://doi.org/10.2307/2298123

Brock, W. A., & Durlauf, S. N. (2001). Interactions-Based Models. In *Handbook of Econometrics* (Vol. 5, pp. 3297–3380). Elsevier.

https://doi.org/10.1016/S1573-4412(01)05007-3

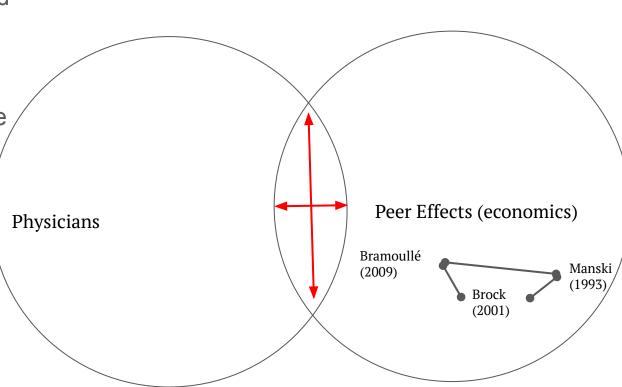

Bramoullé, Y., Djebbari, H., & Fortin, B. (2009). Identification of peer effects through social networks. *Journal of Econometrics*, 150(1),

41–55. https://doi.org/10.1016/J.JECONOM.2008.12.021

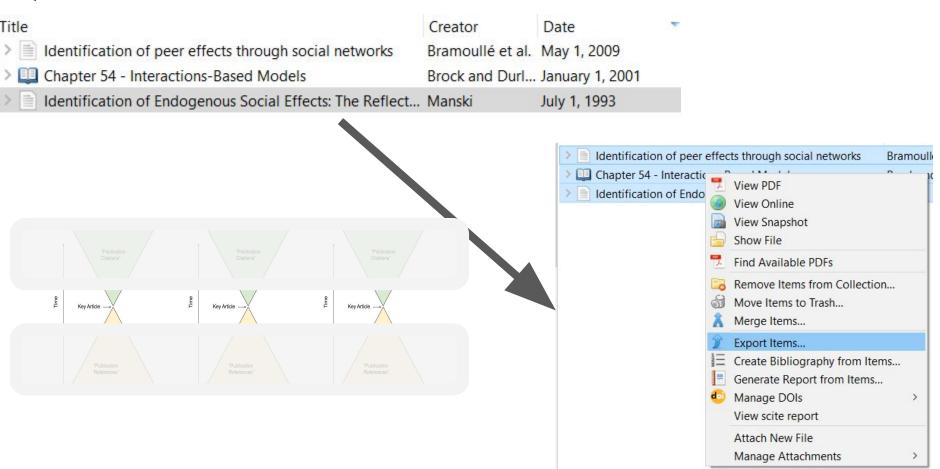

What don't I know?

The broad landscape of how Manski (1993), Brock (2001) and Bramoullé (2009) are used by scholars studying **Physicians**.

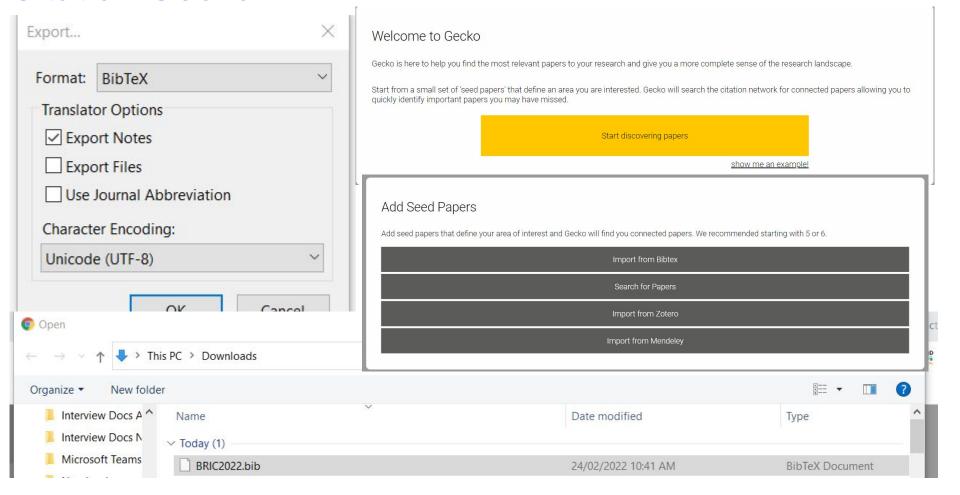

I don't know how to identify the scope of what I don't know.

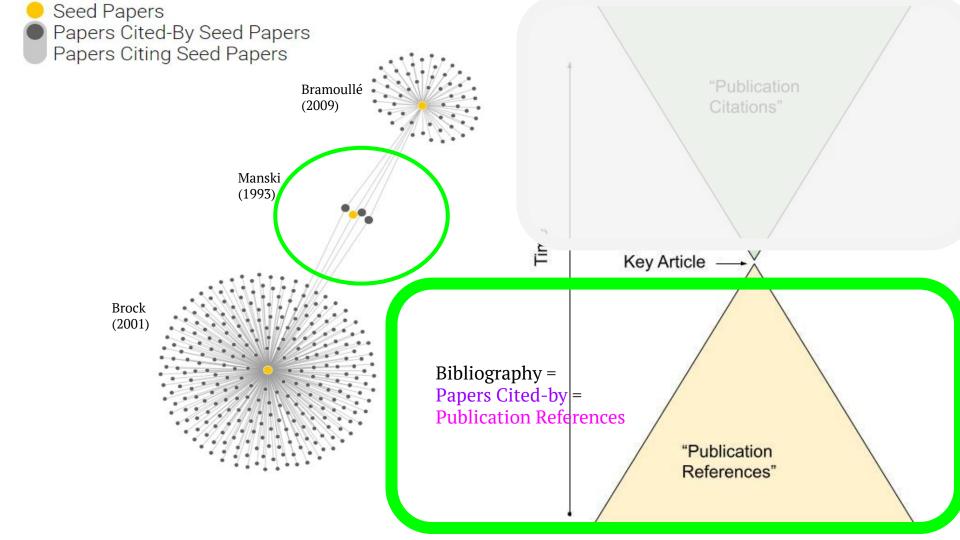

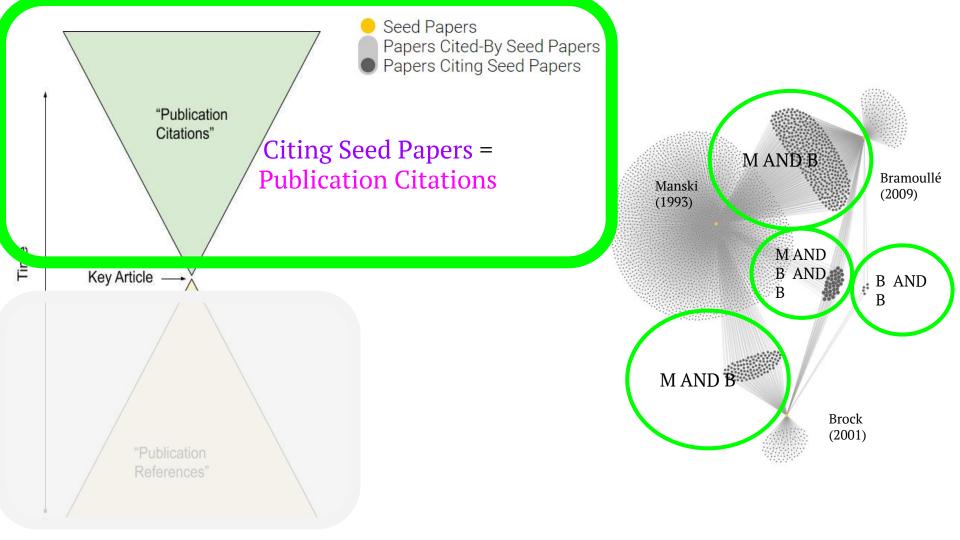

Quick View

Citation Gecko

Lessons

- Highly interconnected
- Not primarily about physicians
- Reached the limit of what citation gecko is capable of telling me
- There is missing data in the bibliography / cited-by / publication references

Tools Used

Williams, B. (2020). Dimensions & VOSViewer Bibliometrics in the Reference Interview. The Code4Lib

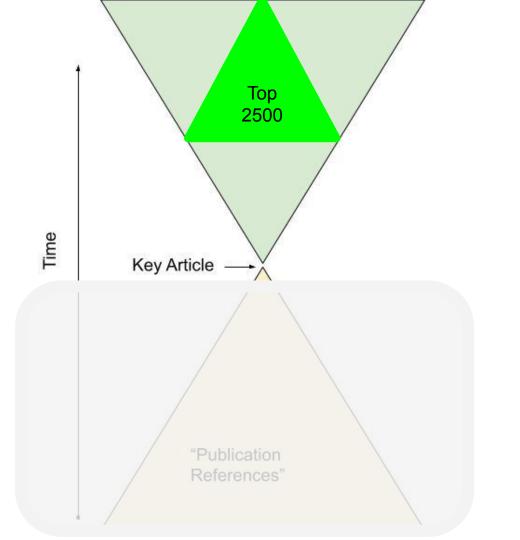

Journal, 47. https://journal.code4lib.org/articles/14964

Methods 1

Export all citations to Manski (1993), Brock (2001) and Bramoullé (2009) found in Dimensions and map how authors

- 1. Cite Manski, Brock OR Bramoullé
- Cite each other
- 3. Top 2500 papers by citation count

Methods 1

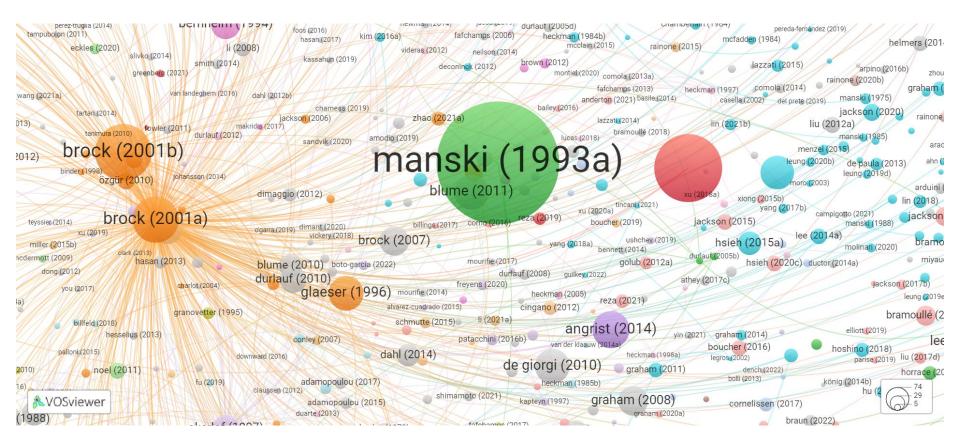

Export all citations to Manski (1993), Brock (2001) and Bramoullé (2009) found in Dimensions and map how authors

- 1. Cite Manski, Brock OR Bramoullé
- 2. Cite each other
- 3. Top 2500 papers by citation count within the data set

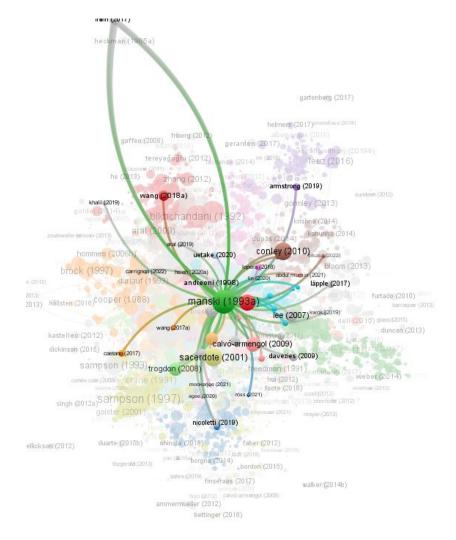

https://app.vosviewer.com/?json=https%3A%2F%2Fdrive.google.com%2Fuc%3Fid%3D14-2Kq-v8GVZymNWhtfXRVNQpNkgrGlkt

"seo (2016) lee (2017a)) =

What did I establish?

Manski is **really** influential in this area of scholarship

Brock & Bramoullé build on Manski and are influential in this area of scholarship

But there's not a lot about physicians

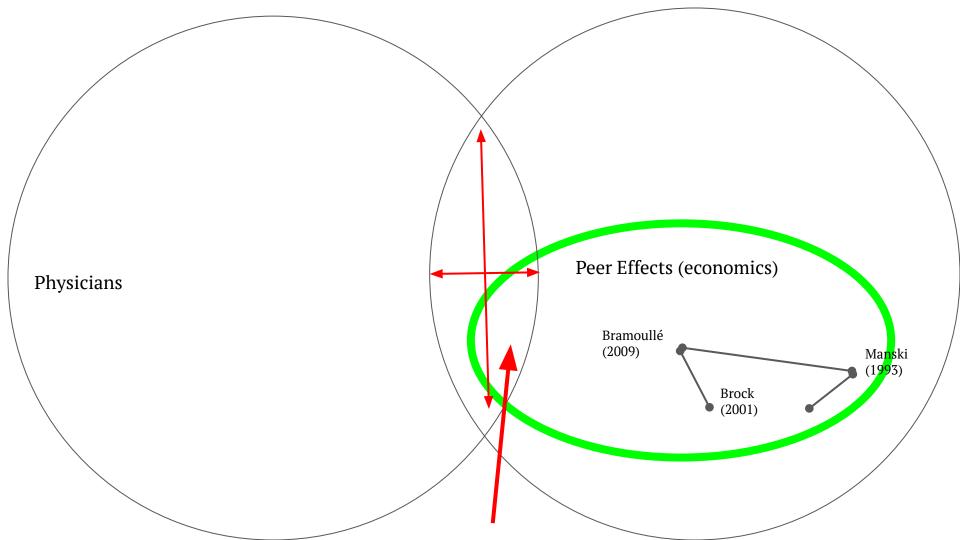

Authors: sampson, robert j.; morenoff, jeffrey d.; gannon-rowley, thomas

Title: assessing "neighborhood effects": social processes and new directions in research

Source: annual review of sociology, 28(1), 443-478

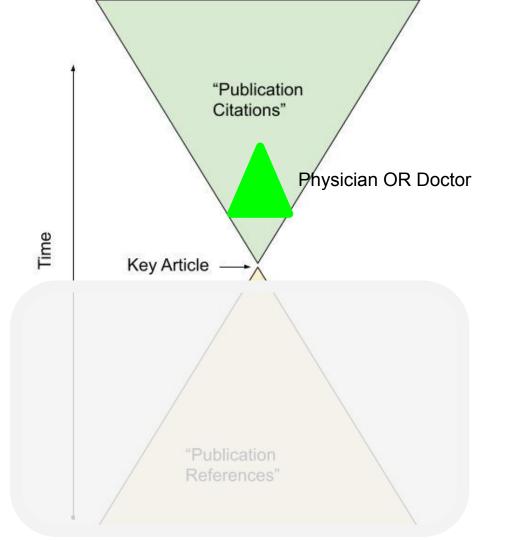

Year: 2002

Methods 2

Export all citations to Manski (1993), Brock (2001) and Bramoullé (2009) searched against for the word 'Physician OR Doctor' in title and abstract in Dimensions and map how authors

- 1. Cite Manski, Brock OR Bramoullé
- 2. Cite each other
- 3. 1 citation
- 4. 1000 by citation count

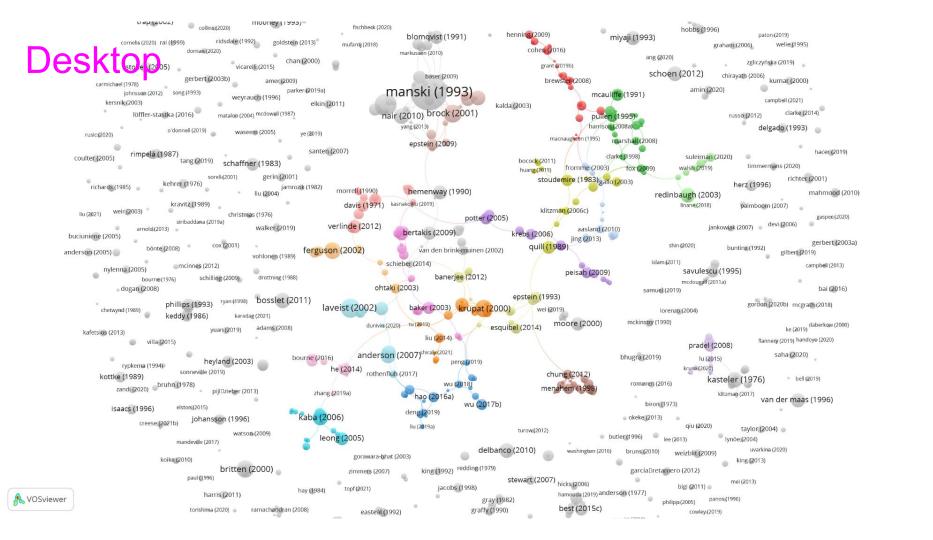

Methods 2

Export all citations to Manski (1993), Brock (2001) and Bramoullé (2009) searched against for the word 'Physician OR Doctor' in title and abstract in Dimensions and map how authors

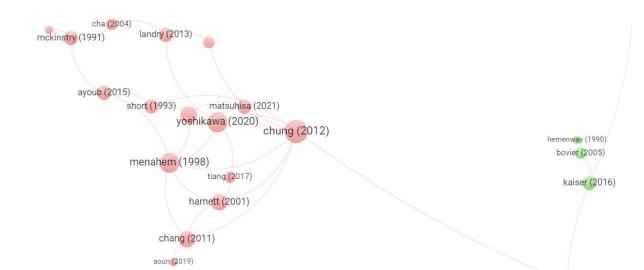

- 1. Cite Manski, Brock OR Bramoullé
- 2. Cite each other
- 3. 1 citation
- 4. 1000 most relevant

Save Image

Computers are dumb, People are smart

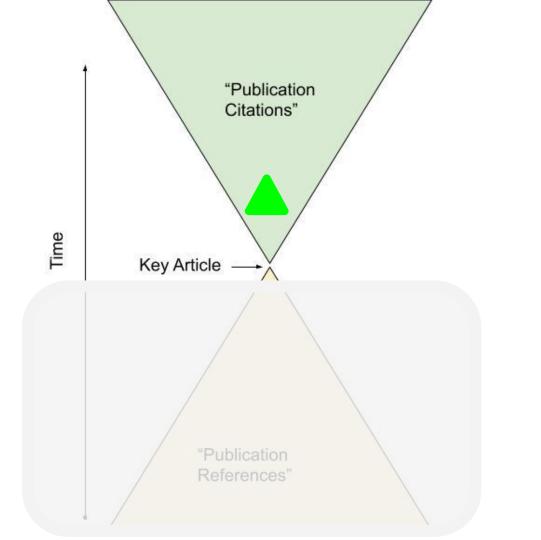

A database doesn't always see the connection between 'physician' and 'doctor'

A database *rarely* sees the connection between physician and nephrologist unless it's explicitly in the code (ie PubMed)

Methods 3

Export all citations to Manski (1993), Brock (2001) and Bramoullé (2009) searched against for a complex string of synonyms* for 'physician' and specialties in Title and Abstract in Dimensions and map how authors

- 1. Cite Manski, Brock OR Bramoullé
- 2. Cite each other
- 3. 1 Citation, ONLY ~300 paper largest cluster

Methods 3

Export all citations to Manski (1993), Brock (2001) and Bramoullé (2009) searched against for a complex string of synonyms* for 'physician' and specialties in Title and Abstract in Dimensions and map how authors

- 1. Cite Manski, Brock OR Bramoullé
- 2. Cite each other
- 3. 1 Citation, ONLY ~300 paper largest cluster

https://app.vosviewer.com/?json=https%3A%2F%2Fdrive.google.com%2Fuc%3Fid%3D1og88dPbUoInOu5YY8RrmBSQJ2jqmJIXb

[surgeon OR doctor OR physician OR clinician OR anesthesiologists OR anesthetist OR psychiatrist OR oncologist OR internist OR geriatrician OR cardiologist OR dermatologist OR Rheumatologist OR nephrologist OR neurologist OR radiologist OR respirologist OR rheumatologist OR paediatrician OR Endocrinologist OR pathologist OR neurosurgeon OR Gynecologist OR Obstetrician OR Ophthalmologist OR urologist OR Neuropathologist]

Thank you to Karen Lee for developing and maintaining this list

How did I know when to stop searching?

Lots of complicated connections, a couple of unique clusters.

Manski, Bramoullé and Brock are central this area.

Citation Gecko Limits

Not great on accuracy before about 2002-2003. None of Manski's bibliography of papers are in the 1993 paper's metadata, only citations to the Manski 1993 paper

US/Canada/Western Europe

Less accurate

Dimensions Limits

Not great on accuracy before about 2002-2003. None of Manski's bibliography of papers are in the 1993 paper's metadata, only citations to the Manski 1993 paper

Coverage is only Sciences (good) and Social Sciences (average)

US/Canada/Europe/China/Japan

VOS Viewer Limits

In active development

Moving beyond default color & layout is highly technical

Only works with Web of Science and Dimensions data for citation mapping.

Co-author, co-citation and other text-mining functions only work well on massive data sets

Garbage In, Garbage Out

Key Tools For The Search Process

- Zotero Centralize collection and export results in BibTex & CSV
 - Scite Plugin
 - DOI Manager
- <u>Citation Gecko</u> Quick Mapping (less accurate)
 - Zotero export in BibTex format
- <u>Dimensions</u> Free access to mapping data with a verified university email address
- <u>VOSViewer</u> Accurate Map (More accurate, more complicated)
- Custom Formatting Tools to speed up search strategy
 - Google Sheets
- Chrome Plugins
 - <u>LinkGrabber</u> grabs direct links to sites for later processing
 - HighlightThis Lists of DOIs to spot key articles
 - o OpenMultipleURLs Does what it says on the label
 - <u>Unpaywall</u> Another way to grab PDFs
 - Scite

Tools & techniques detailed here

Williams, B. (2020). Dimensions & VOSViewer Bibliometrics in the Reference Interview. The Code4Lib Journal, 47.

https://journal.code4lib.org/articles/14964

The VOSviewer software provides easy access to bibliometric mapping using data from Dimensions, Scopus and Web of Science. The properly formatted and structured citation data, and the ease in which it can be exported open up new avenues for use during citation searches and reference interviews. This paper details specific techniques for using advanced searches in Dimensions, exporting the citation data, and drawing insights from the maps produced in VOS Viewer. These search techniques and data export practices are fast and accurate enough to build into reference interviews for graduate students, faculty, and post-PhD researchers. The search results derived from them are accurate and allow a more comprehensive view of citation networks embedded in ordinary complex boolean searches.

Thank you.
